Small Bone Solutions

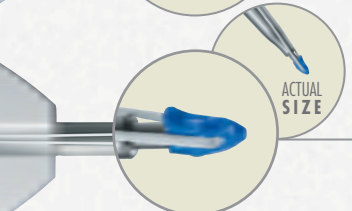

Small Bone Solutions & Craniofacial Repairs

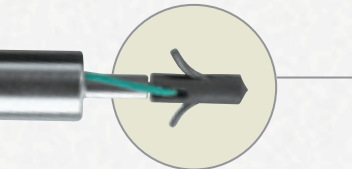

MINILOK™ Absorbable QUICKANCHOR™ Plus

MINILOK provides strong, absorbable soft tissue fixation for wrist, hand, foot and ankle applications.

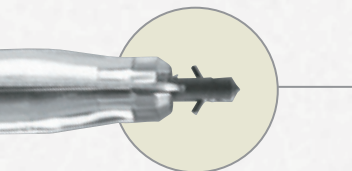

MICROFIX™ Absorbable QUICKANCHOR Plus

MICROFIX is an excellent solution for precise soft tissue-to-bone fixation in the smaller bones of the digits.

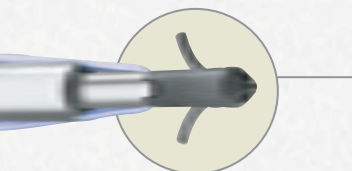

Mini QUICKANCHOR Plus

This small anchor is for use in certain shoulder, elbow, wrist, hand, foot and ankle applications.

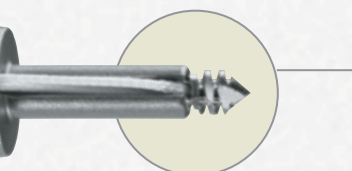

Micro QUICKANCHOR Plus

This tiny anchor is for use in certain hand and craniofacial applications.

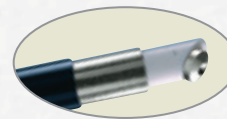

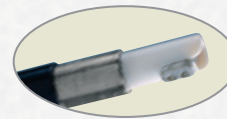

GII® QUICKANCHOR Plus

The GII QUICKANCHOR Plus is for use in a range of repairs to the shoulder, wrist, hand, foot, ankle and elbow.

TACIT®

This small anchor is for use in certain wrist, hand and craniofacial applications.

VAPR® Small Joint Electrodes

The 2.3mm diameter, malleable tip, bipolarity, and short shaft design make these VAPR electrodes useful for hard-to-reach areas of the wrist, ankle and elbow. The solid tip design delivers controlled energy to precisely where it is needed to cut and contour soft tissue.

Strada Small Joint Instrumentation

Graspers, biters, scissors and probes for small joint arthroscopy applications
