

Clarity & Efficiency

Problem: Bleeding

Problem: Debris

Solution: FMS Clarity

Choosing the fms solo keeps you in control when conditions change – allowing you to increase pressure at a moment's notice, providing a clear field of vision. Because the fms solo maintains clarity in the operative field, the focus becomes the patient and the procedure – not on operating the pump.

-
- Provides optimal visualization for the **surgeon**
 - Offers easy set-up and minimal prep time for **operating room staff** efficiencies
 - Increases the opportunity for significant cost savings to the **hospital**

Concentrate on the Patient, not the Pump

FEATURES & BENEFITS

- Pressure Cycle Mode to control bleeding
- Flow Compensator to improve visualization when the shaver is in use
- Remote Control or Foot Pedal to control pump functions and Pressure Cycle Mode
- Easy Set-up with color coding and labeling
- One Day Set Irrigation Tube creates cost savings
